INTERNSHIPS

DEC 2025

MERN Stack Intern at CodeHub Nexus, developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Built RESTful APIs, implemented CRUD operations, and designed responsive user interfaces while collaborating using Git/GitHub. Focused on debugging and optimizing applications to improve performance and user experience.

PROJECTS

SmartCivic – Urban Issue reporting and resolution platform [GitHub](#)

JULY 2025

Developed SmartCivic, a web-based platform for efficient civic issue reporting and management, enabling users to register complaints and track resolution status. Built using React.js, Node.js, Express.js, and PostgreSQL, implementing scalable backend services and responsive user interfaces.

Hostel Management System using Spring Boot [GitHub](#)

NOV 2025

The Hostel Management System is a full-stack web application developed using Spring Boot, MySQL, HTML, CSS, and Thymeleaf. It automates hostel operations such as student registration, room allocation, and fee management with secure role-based access. The system improves efficiency by reducing manual work and ensuring accurate data management.

MedFind – Medicine Availability Finder (MERN Full-Stack Application) [GitHub](#)

DEC 2025

Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) that helps users search for medicines and locate nearby pharmacies with available stock. The platform provides a responsive React interface for medicine search and displays pharmacy details in real time. MongoDB is used to manage medicine inventory and pharmacy data, enabling faster access to essential medicines during emergencies.
